It is the first game in the Simulacrum Series. This update also includes new 'Map Cards' that you can use to add your own scenery to the game. Simulacrum introduces an island that is entirely underwater, and allows the player to play as a fish, a squid, a crustacean, or a jellyfish. You will be able to use all of the basic controls of other Sims 4 games in a water environment, and can view and manipulate some objects while underwater. Simulacrum also includes a new map creator, allowing you to create your own islands or scenarios. The second season of Simulacrum released on December 26, 2014. It was made by the same developer as Simulacrum and comes with an expansion of 10 island maps and 2 new fish species. Season 1. Simulacrum is a
